SUMMARY

Motivated cybersecurity major with strong problem-solving skills and a growing technical foundation in networking, Linux, and programming. Skilled at adapting quickly in fast-paced, team-oriented environments, with experience in customer service that has built strong communication, responsibility, and follow-through. Eager to apply technical and interpersonal skills to contribute effectively in a professional setting.

EDUCATION

Houston Christian University

Houston, TX

Bachelor of Science in Cybersecurity

Aug 2024 – May 2028

- **Clubs and Leadership Roles:** National Honor Society — Member 2023–2024
- **Relevant Coursework:** Intro to Cybersecurity, Intro & Intermediate Programming, SQL, Data Structures, Operating Systems, Computer Networks, Cloud Architecture (current)

EXPERIENCE

Server

Nov 2025 – Present

P.F. Chang's

- Greet and serve guests throughout their dining experience, taking accurate orders and answering menu questions
- Manage multiple tables at once in a fast-paced environment, coordinating with kitchen and support staff to keep service on time
- Handle payments and guest concerns accurately and professionally, aiming for a positive overall experience

Volunteer

Aug 2023 – May 2024

American Red Cross

- Assisted with disaster relief efforts, providing shelter, food, and support to individuals affected by emergencies
- Supported blood drives by registering donors and ensuring a welcoming, well-organized environment

Manager

Jan 2020 – Feb 2021

Professional E-Sports Team

- Coordinated team schedules, scrimmages, and tournament participation across multiple gaming titles
- Managed team communications, ensuring timely updates and strong collaboration among players and staff

PROJECTS

Reaction Time Trainer | *Python*

- Built a Python application that measures and records user reaction times, applying control structures and basic event handling

Hospital Management Queue System | *Java*

- Developed a Java program simulating a hospital patient queue, applying queue and data structure concepts to manage patient order and priority

TryHackMe / Home Lab | *Linux, Networking*

- Beginning hands-on practice in networking, Linux, and basic web vulnerabilities through TryHackMe and a self-built home lab

Belsade Tech / Ryzn AI | *Server Infrastructure, AI Platform*

- Building and managing a server rack infrastructure, enabling clients to host their own websites
- Contributing to development of an AI platform designed to serve as an alternative to traditional LMS tools like Canvas for course delivery and management

CERTIFICATIONS

CompTIA Security+ (SY0-701) [in progress] | *CompTIA*

TECHNICAL SKILLS

Languages: Python, Java, SQL

Frameworks / Technologies: Linux Basics, Networking Fundamentals (TCP/IP, DNS, Subnetting), Cloud Architecture Fundamentals, Data Structures, Video production & Editing

Tools & Other: Customer Service, Time Management, Team Coordination, Attention to Detail
